
The ICPRB Annual Report is a synopsis of the Commission's work over the previous year and a vision of actions into the future. The Annual Report is a resource for citizens providing information on the health of the Potomac River and its major tributaries as well as information on our ongoing work to protect and restore the Basin's water quality and living resources, to protect our drinking water supply, and to educate and empower those living in the Potomac River Basin. Please contact us for previous annual reports.
