

The Interstate Commission on the Potomac River Basin

Our mission is to enhance, protect, and conserve the water and associated land resources of the Potomac River and its tributaries through regional and interstate cooperation. Considered the "Nation's River," for more than five million basin residents, the river plays an important role in the lives of all. Through regional cooperation and partnerships, ICPRB is protecting the river and improving the quality of life in the watershed, as it has since 1940.

The Interstate Commission on the Potomac River Basin (ICPRB) is an [ICPRB Compact](#) commission established by Congress in 1940 to help the Potomac basin states and the federal government to enhance, protect, and conserve the water and associated land resources of the Potomac River basin through regional and interstate cooperation. The ICPRB is represented by appointed [Commissioners](#) from Maryland, Pennsylvania, Virginia, West Virginia, the District of Columbia, and the federal government.

The Commission conducts quarterly business meetings. For Fiscal Year 2008, the meetings are scheduled for December 3-4, March 10-11, June 9-10, and September 8-9. Locations of meetings and agendas for each meeting will be announced closer to the meeting dates. The public is welcome to attend the meetings, however space is limited. If you would like to attend a meeting, contact the Commission at 301.984.1908 for more information.

The Commission works through a strategic plan that shapes its activities to support its goals and objectives.
