ICPRB Seeking Deputy Director of CO-OP Operations

Deputy Director of CO-OP Operations

The Interstate Commission on the Potomac River Basin has an opening for a senior level Water Resources Engineer. The incumbent provides leadership and oversight for water supply planning studies and activities, especially daily operations of the section. Ensures technical support is given to the water suppliers, manages various analyses throughout the Potomac River basin that address water supply for the regional suppliers, develops and supervises the preparation of written reports for technical and modeling work performed by the section, provides presentations to diverse audiences, directs the daily operations of the section with a focus on coordination and planning to ensure that action plans are in place, rehearsed and up to date to respond to drought and water supply emergencies.

The position requirements are: a masters degree in engineering, and five years of highly relevant experience, and registration as a Professional Engineer, or with the ability to attain registration within six (6) months of employment are required for this position. A Ph.D. in engineering, or a closely related field of study, with demonstrated ability to perform the duties and responsibilities, may be substituted for up to three (3) years of the experience required. A broad knowledge of precedents in water resources planning and management and demonstrated record in dealing with other agencies and organizations are essential.

Salary commensurate with education and experience. ICPRB provides excellent benefits. Please send resume and salary history by October 1, 2008, to: bpark@icprb.org . EOE seeking diversity.
