Re: Hydrographs of Little Falls gage flow 2006

Roland Steiner
WSSC

Dear Roland,

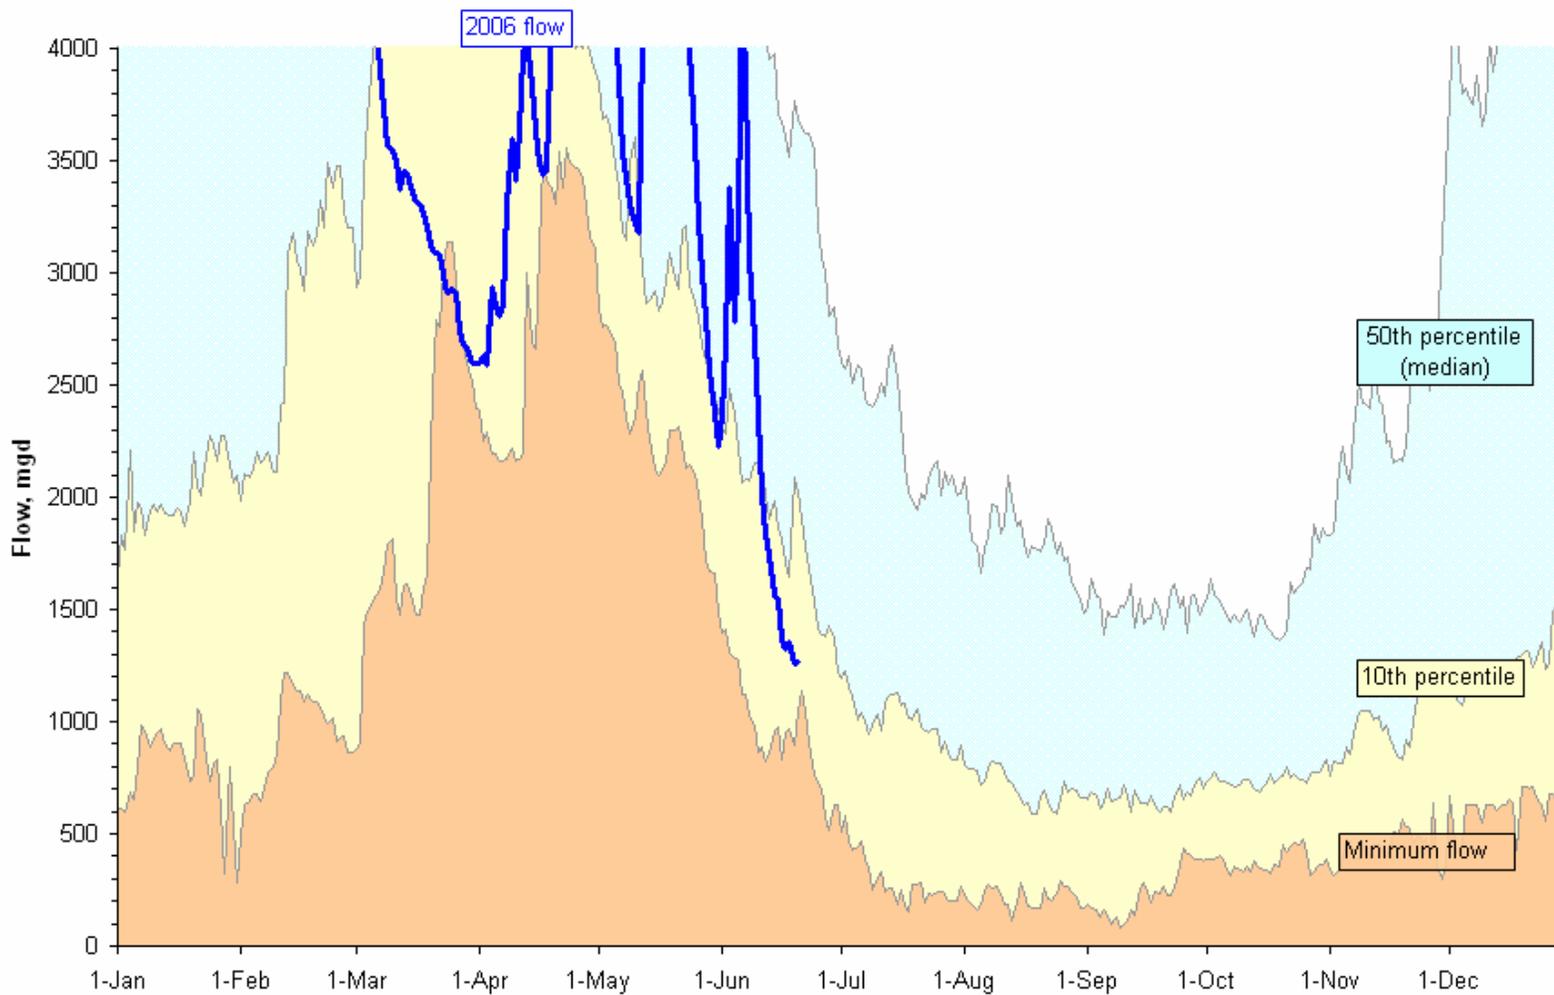

Please find attached hydrographs of Little Falls gage flow for 2006. The graphs show the minimum flow that occurred for each day of the gage record, the 10th percentile flow, and the median flow. Flow percentiles are based on USGS published gage data from 1930 to 2003. The second graph is the same as the first but at a different scale.

Please do not hesitate to call with any questions.

Regards,

Erik Hagen
