

Goals

Project goals need to be set at the beginning of any project. Your Student Stormwater Action Project is no different. While the *primary goal will be to reduce stormwater runoff*, your Stormwater Action Project also can serve other goals for humans, animals, and the environment. Below are other possible goals for your conservation landscape or garden.

- Provide pollen for butterflies, birds, and insects.
- Provide habitat and food for wildlife.
- Create an outdoor classroom or sitting area.
- Provide food for humans.
- Provide a beautiful space for students and teachers to enjoy.
- Provide places for the scientific observation of plant growth, soil changes, pollination, etc.
- Reduce carbon dioxide air pollution.
- Provide education on stormwater reduction (through signage).

Envision your school project. What goals do want to set for your project?

Note: these goals will be further discussed with the class, so that all students involved in the Stormwater Action Project have a voice in determining which goals are most important.
