Top Challenges to Forest Management

- **User Groups**
- RTEs
- Education
- Markets
- Funding

NOT A CHALLENGE: The actual forest

A Few Solutions

- Gates
- Trail Closures
- Cameras
- Partnerships

- Tree Farm Designation
- Invasive Species Management
- Prescribed Burns

Introduction and Background...

How did we get here?...

What are our Goals?...

Why do we use fire?...

What's Worked/Not Worked

- Direct Outreach
- Story Maps
- **Active Forest Management**
- Firewood Permits
- Messaging Through Partners
- Trail Closures

layer, while also helping to reduce the density of young, mixed

Pitch Pine seedling, spring 2017, following November 2016 burn.

The 2016, 2019, and medium intensity fires forth in the written burn parameters and limits burn. A burn that is all damage residual pine containment lines. The fire, slowly eating away the young, thin bark m

How do we burning?..

Prescribed fires require for a safe and effective technique is the primary prescribed fires on the with a test fire to confirm backing fire is lit on the known as blacklining.
